HYPERBARIC OXYGEN THERAPY (OTI)

Using a staff of hyperbaric doctors and hyperbaric technicians of great experience and professionalism, Hyperbaric Work Services Srl deals with hyperbaric therapy in the public and private sectors with high clinical standards, treating not only decompression pathologies, but also all those pathologies in which OTI has benefits, which have long been validated by scientific research. By Hyperbaric Oxygen Therapy (OTI), we mean the breathing of pure oxygen, exploiting the increase (in a hyperbaric regime) of oxygen dissolved in the plasma at an absolute pressure greater than 1.5 bar.

TUNNELLING – TBM

For more than 25 years he has developed his experience working with big companies in Tunneling sector, assisting customers and providing them with consultancy, procedures, medical assistance and hyperbaric support, in the works of large infrastructures, with specialized medical personnel, professional hyperbaric technicians and Tunneling technicians (OTT).

The most important customers:

- Consortium Condometro
- Metro C S.c.p.A Project Company
- Cooperative CMC Ravenna
- Micoperi S.p.A.

The staff of HWS S.r.l. acquired its experience by collaborating with CIR S.r.l. of Rome which carried out works for the construction of Tunneling with TBM in:

1995 for extension of underground Line A in Rome with the Condometro Consortium of Condotte Spa;

2008 section of the underground Line C of Rome with "Astaldi" Metro C S.c.p.A Project Company

2014 for the motorway tunnels on the SS 640 Caltanissetta with the CMC Cooperative of Ravenna;

2015/2020 extension of underground Line C in Rome with "Astaldi Metro C" S.c.p.A Project Company;

Dottor Corrado Costanzo (co-founder)

Medical director responsible for routine and emergency medical procedures and management in clinical and industrial settings.

Coordinates the Health, Medical and Nursing staff, who carry out work in the clinical and In-Off-Shore sector, in the mechanized excavation work with TBM and in the Hyperbaric Medicine Centers for the treatment of Decompression Pathology (PDD) and/or Hyperbaric Oxygen Therapy (OTI).

KNOW HOW

Hyperbaric Work Services has collaborated with companies active in commercial diving and in the construction of tunnels. He acquired his own medical and technical experience by carrying out work in the port and offshore sector for various Italian underwater companies for the pipelines positioning.

In the construction sites built, more than 2000 man hours have been spent in the last 2 years (2018-2020), in particular for the management and tunneling operations, ranging from machine maintenance to emergency interventions.

MISSION

Our mission is to achieve univocal and reliable performances, having as objective the safety of the personnel and operating with professionalism and respect. Our goal is to become the privileged partner of companies operating in the Tunneling industry and in the Diving Off-shore sector, operating in line with the most stringent requirements of the sector.

Bruno Buttignon (co-founder)

Technical Director, Hyperbaric Technical Operator responsible for the correct use of compression and decompression procedures during hyperbaric operations and for functioning of hyperbaric systems. Coordinates all the technical staff.
